

DEPARTMENT OF THE ARMY
OFFICE OF THE DEPUTY CHIEF OF STAFF, G-1
300 ARMY PENTAGON
WASHINGTON DC 20310-0300

DAPE-MPE-DR

10 MAR 2003

MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: FY03 Department of the Army, Active Component, Enlisted Distribution Policy

1. Purpose. To prescribe policy for the distribution of all active component enlisted personnel for FY03.
2. Scope. This memorandum is a short-range document linking AR 220-1 (Unit Status Reporting) and the assignment of active component enlisted personnel in fiscal year 2003 to include: initial assignments, permanent change of station (PCS) reassignments, and reassignments within commands. This policy is consistent with Chief of Staff of the Army (CSA) Manning Task Force decisions. This guidance is subject to revision or suspension during contingency operations.
3. References.
 - a. Army Chief of Staff Message, Subject: Manning the Force Implementation, 8 November 1999.
 - b. Army Chief of Staff Message, Subject: Manning the Force Update, 16 May 2001.
4. Responsibilities.
 - a. The Office of the Deputy Chief of Staff, G-1, Enlisted Career Systems Division (DAPE-MPE-DR), is responsible for formulating, coordinating, and publishing the Enlisted Distribution Policy.
 - b. The Director, Enlisted Personnel Management Directorate, US Total Army Personnel Command (PERSCOM), is responsible for shaping the force and distributing soldiers to the Installation/Distribution Management Level (DML) in accordance with this policy.
 - c. MACOM Commanders are responsible for:
 - (1) Implementing the Enlisted Distribution Policy, ensuring field commanders adhere to it, and ensuring installation strength managers assign soldiers directly to Early Deploying units. For installations with units in fill priorities 1 and 2, ensure distribution to units is consistent with this policy.
 - (2) Requesting exceptions to this policy through the Deputy Chief of Staff, G-1 and informing PERSCOM of internal command priorities affecting the distribution of soldiers according to this policy.
 - (3) Forwarding this policy, supplemented as appropriate, to subordinate units and activities.

5. Principles of Distribution. The following principles serve as the cornerstone of the Enlisted Distribution Policy.

a. Strength management is a command responsibility. Commanders at all levels will ensure that enlisted personnel strength is distributed in accordance with this policy. Accordingly, personnel policies must serve the Army as a whole, rather than the individual MACOM.

b. Enlisted Distribution Policy is implemented through Enlisted Distribution Targets (EDT). These targets incorporate all DA policies, MOS / grade level inventory projections (faces), and approved force structure decisions (spaces). Strength managers must fill units to target, not to authorizations. When assessing unit fill at MOS and grade, strength managers should compare unit fill to the target, and not to the Army average displayed on the Enlisted Distribution and Assignment System (EDAS). EDAS authorizations do not include the force structure adjustments listed below. The targeting process is outlined at Enclosure 1.

c. Enlisted distribution targets account for force structure decisions not included on MTOE documents used by MACOMs. For targeting and distribution, approved force structure decisions include the following (detailed descriptions are at Enclosure 2):

(1) Authorizations documented in the Personnel Management Authorization Document (PMAD) or Updated Authorization Document (UAD).

(2) Directed Military Overstrength (DMO).

(3) Directed Fill positions.

d. Personnel are assigned only to positions listed above. Units will not be assigned additional soldiers for training exercises, rotational deployments, or unit transformation. Examples where units will not receive additional soldiers include: CTC rotations; KFOR/SFOR rotations; Army Warfighting Experiments (AWE); and Brigade Set Fielding (BSF).

e. Grade and skill match is measured by three grade bands: Skill Level 1 (E1-E4); Mid-Career NCO (E5-E6); and Senior NCO (E7-E9). Promotable soldiers are counted in their current grade.

f. Distribution policies may be amended based on critical shortages of MOS/skill level or operational necessities.

6. Policies.

a. General Distribution Policy. Units and positions are identified as Fill Priority 1 (FP1) or Fill Priority 2 (FP2).

(1) Fill Priority 1. These units and positions will be targeted to 100% of authorizations in the aggregate, with a goal of 100% target of MOS/Grade-band authorizations.

(2) Fill Priority 2. These remaining units and positions will receive an equitable distribution of projected inventory after targeting Fill Priority 1 units and positions.

b. Specific Policies.

(1) PERSCOM will continue to provide pinpoint distribution to CONUS-based major combat units. Commanders responsible for reassignment processing and strength management activities must ensure that soldiers arriving at their installations/theaters are assigned to the DML directed by PERSCOM, and further assigned to specific units in compliance with the distribution priorities outlined in this document.

(2) PERSCOM will begin providing pinpoint distribution to the 172nd Separate Infantry Brigade in Alaska in preparation for its transformation to SBCT3.

(3) PERSCOM will not make pinpoint assignments directly to units identified as early deploying units. PERSCOM will provide each command or installation sufficient resources to meet the enlisted distribution targets in early deploying units, and to man its non-prioritized elements to levels consistent with other non-priority units throughout the Army. Installation strength managers are responsible for assigning personnel to meet targets in early deploying units.

(4) To reduce the impact of this policy on non-priority units, all FP1 and FP2 units will be targeted to 70% of authorizations by MOS and grade before further targeting FP1 positions to 100% of authorizations.

(5) Enlisted linguists are exceptions to this policy and must be managed separately. Distribution priorities for enlisted linguists are established and disseminated to MACOMs by PERSCOM, TAPC-EPL-M (Language Branch).

7. Fiscal Year 2003 Enlisted Distribution Goals.

a. Continue to target all FP1 units/positions designated prior to FY00, HQDA approved DMO and Directed Fill, and all current exceptions to the CSA manning guidance at 100% of authorizations in the aggregate. These units and positions are listed at Enclosure 3.

b. Continue to target the 10 Active Component Divisions, Separate Brigades, and two Armored Cavalry Regiments at 100% of authorizations in the aggregate.

c. Target all units designated by the Deputy Chief of Staff, G-3 as FY03 Early Deploying Units (EDUs) at 100% of authorizations in the aggregate, and fill these units to target by the end of FY03. These units are listed at Enclosure 4.

d. Continue to target all previously designated Early Deploying Units not included on the FY03 ED list at 100% of authorizations in the aggregate. FY01/FY02 EDUs not included on the FY03 list are listed at Enclosure 5.

e. All units and positions not listed above are Fill Priority 2. Remaining targets will be distributed equitably between FP2 TOE and FP2 TDA units/positions by MOS/Grade-band.

f. All prioritized units and positions are targeted to 100% of authorizations by MOS and Grade-band if projected inventory permits. Soldier stabilization and quality of life policies, however, may prevent distribution to these targets. At the DML/Installation level, units targeted to 100% aggregate fill should expect a 93% to 95% MOS/Grade-band match.

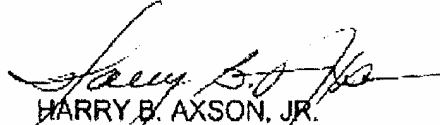

DAPE-MPE-DR

SUBJECT: FY03 Department of the Army, Active Component, Enlisted Distribution Policy

8. Exceptions. Requests for exception to this policy should be addressed to this headquarters, G-1, ATTN: DAPE-MPE-DR. Current DMPP approved exceptions to MTF guidance are listed at Enclosure 3.

9. Effective Date and Expiration. This memorandum is effective upon publication and supersedes previously published editions of this policy. Interim changes will be in the form of an addendum to this policy memorandum. Expiration will be upon publication of updated distribution guidance for FY04.

Enclosure 1: Enlisted Distribution Targeting Process

1. General. The Enlisted Distribution Target Model (EDTM) generates enlisted distribution targets at the UIC, MOS and grade level of detail. The model aligns projected monthly operating strength by MOS and grade with approved force structure decisions in accordance with HQDA policy.

2. Specific. EDTM creates enlisted distribution targets in phases.

a. Phase 1 – Units and positions, both FP1 and FP2, that are exceptions to the general distribution policies are targeted to specified levels directed by HQDA. These units and positions are the first to be targeted, without subsequent adjustments.

b. Phase 2 – All units/positions are targeted to 70% of their authorizations by MOS and grade. This minimum targeting level reduces the impact of shortage MOSs and grades on FP2 units. MOS and grade combinations without enough projected inventory for a 70% target will have targets evenly distributed across both fill priorities.

c. Phase 3 – After targeting to a 70% minimum, remaining inventory is targeted to FP1 units and positions. These units/positions are targeted to 100% of authorizations, or until all projected inventory is distributed.

d. Phase 4 – Once FP1 units/positions have been targeted, all remaining inventory is targeted to the FP2 units and positions. These units/positions are also targeted to 100% of authorizations if projected inventory is available.

e. Phase 5 – Inventory still remaining after Phase 4, is used to create additional targets (over-targets) in FP1 units/positions. These over-targets are used to compensate for target shortages in other MOSs and grades. The purpose of over-targeting is to ensure FP1 units/positions are targeted to 100% of manpower requirements in the aggregate. Over-targets are created only in those MOS and grade combinations units are authorized, and only after FP2 units/positions have been targeted to 100% of their authorizations. To the extent possible, over-targets provide for “one up” grade substitution.

f. Phase 6 – Any remaining inventory is targeted to FP2 units. As in Phase 5, over-targets are created only in those MOS and grade combinations the FP2 units are authorized.

Enclosure 2: Detailed Explanations of Approved Force Structure Decisions

1. Approved force structure decisions come from three different sources. Enlisted distribution targets are based only on positions from these sources:

a. Personnel Management Authorization Document (PMAD). The “single source of authorizations” for management of the enlisted force is the PMAD. It is the basis for the distribution of enlisted soldiers to MACOMs and installations. The PMAD often applies very recent management decisions at UIC, MOS, and grade, and may not yet be reflected in MOTE/TDA documents currently used by MACOMs.

b. Directed Military Overstrength (DMO). DMOs are HQDA approved active component manpower authorizations used for unforeseen, high-priority, temporary manpower requirements of 12 months or less. DMO positions are designed to support unprogrammed requirements until they can be supported through MACOM reassignment of priorities, the Command Plan / Total Army Analysis Process or the requirement ends. The Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs) (SAMR-MBA) is responsible for processing, coordinating, and approving DMO requests.

c. Directed Fill. Directed fill authorizations are unforecasted, high priority manpower requirements approved through HQDA. These requirements include approved Training Resource Arbitration Panel (TRAP) decisions to increase training capacity at TRADOC service schools, increases and changes in the detailed recruiter structure, increases in fill directed by Senior Army leadership to fix short term readiness problems, or adjustments required to correct errors in a published PMAD or UAD.

2. Only PMAD authorizations are visible on the Enlisted Distribution and Assignment System (EDAS). Strength managers must consider the impact of DMO and Directed Fill positions that may be targeted, but not visible in EDAS.

Enclosure 3: FP1 Units / Positions Designated Prior to FY00, and Current Exceptions to CSA Manning Guidance.

UNITS & POSITIONS DESIGNATED AS FP1 PRIOR TO MTF GUIDANCE
--

All Special Forces Groups
75th Ranger Regiment
160th Special Operations Aviation Regiment
Joint Activities (Less SHAPE)
Supreme HQ Allied Powers Europe (SHAPE)
Department of Defense (DOD) Agencies
Military Enlistment Processing Command
1st Army SPT BN (SINAI)
Allied Command, Europe
Special Management Commands: CENTCOM, EUCOM, PACOM, SOUTHCOM
US Army Signal CMD, Kuwait/Saudi Arabia
US Army Training Mission, Saudi Arabia
US Army Space Command
Nominative Agencies and Positions
HQDA Approved Directed Military Over Strength
Cover Support Program / Special Management UICs
Field Recruiting Force (Including Detailed Recruiters)
Drill Instructors (TRADOC and MEDCOM) - SQI = 'X'
Service School Instructors (TRADOC and MEDCOM) - SQI = 'H' / '8'
3rd US IN Regiment (Old Guard)
MOS 95C Corrections Specialists, USDB, FT Leavenworth
Fort Irwin Operations Group (NTC)
JRTC (OPS GRP and 1-509th IN)
Battle CMD Training Program (OPS GRP)
Combat Maneuver Training CMD (OPS GRP)
AC Support to RC (Titled positions only)
Ranger Training Brigade
Ranger Positions – W. Hemisphere Institute for Security Cooperation

Enclosure 3: FP1 Units / Positions Designated Prior to FY00, and Current Exceptions to CSA Manning Guidance.

CURRENT EXCEPTIONS TO CSA MTF GUIDANCE

Target Remaining Units in Special Operations Command as FP1
Target USASOC Elements at 100% of Required / Auth (higher of the two)
Target 160th SOAR at 110% of Required / Auth (higher of the two)
Target JFK Special Warfare School as FP1
Target 173rd ABCT in Italy as FP1
Target 11th ACR, Fort Irwin (OPFOR) as FP1
Target Maintenance Units at Fort Riley as FP1 (WB33AA, WEU3AA)
Target ADA Units at Fort Lewis as FP1 (Supports SBCT Transformation)
Target Total Army Personnel Command (PERSCOM) as FP1
Target Inspector General (IG) Positions as FP1 (SQI = 'B')
Target NCO Academies as FP1:
 Fort Stewart
 Fort Drum
 Fort Campbell
 Fort Bragg
 Fort Lewis
 Fort Polk
 Fort Hood
 Fort Richardson
 Europe
 Hawaii
 EUSA

Target MOS 95B at White Sands Missile Range to 100% of Authorizations
Target MOS 92R at Fort Benning to 100% of Authorizations
Target MOS 71L, E6 in Cadet Command to 100% of Authorizations
Target MOS 92G in EUSA to a Minimum of 96% of Authorizations
Target MOS 95B in MDW to a Minimum of 89% of Authorizations
